EDUCATION

Bachelor of Engineering in Automatic Control and Robotics

Poznan University of Technology

2017 - 2021

PROJECTS

Resolute - Fullstack Issue Tracker | Next.js TypeScript MySQL

I built this Fullstack Issue Tracker App to streamline issue management, allowing users to add, edit, prioritize, assign tasks and track progress. It uses Next.js, React, TypeScript, Tailwind CSS, Radix UI, Prisma and NextAuth.js for authentication. This project required skills in full-stack development, UI design and API integration.

Anime Radar - Anime Discovery App | React TypeScript

I built Anime Radar to help anime fans discover shows by genres, order type, and status. Using React, TypeScript, Zustand, React Query, React Router and the Jikan API, it offers search functionality and detailed show info. This project required skills in front-end development, API integration and UI design.
